Welcome to Esco

Esco's Vision is to provide enabling technologies for scientific discoveries to make human lives healthier and safer.

The Esco Lifesciences Group is committed to deliver innovative solutions for the clinical, life sciences, research, industrial, laboratory, pharmaceutical, and IVF community. With the most extensive product line in the industry, Esco have passed a number of international standards and certifications. Esco represents innovation and forward-thinking designs, that are of the highest standard quality since 1978.

Availability and Accessibility. Esco has headquarters in Singapore, Indonesia, and Philippines, with manufacturing facilities are located in Asia and Europe. Research and Development (R&D) is conducted worldwide spanning the US, Europe and Asia. Sales, services and marketing subsidiaries are located in 42 major markets including US, UK, Japan, China and India. Esco regional distribution centers are located in Singapore, Malaysia, Thailand, Vietnam, Myanmar, Indonesia, Philippines, Bangladesh, Hong Kong, Taiwan, South Korea, China, Japan, India, UAE, Central and South Africa, Denmark, Germany, Italy, Lithuania, Russia, United Kingdom, and USA. Because of our worldwide presence, you can be sure that Esco is within your reach.

High Quality, Reliable, and Dependable. Esco products are of high quality, reliable, and dependable; assuring customers of research accuracy. Cross functional teams from Esco Production, R&D, Quality Assurance, and Senior Management, are regularly assembled to review and implement areas for improvement.

Esco Cares for Your Safety. Esco focuses on providing safety not just for your samples but also for you and the environment.

Esco Cares for Your Comfort. Building ergonomic designs and reducing noise levels of the units ensures comfort for our users.

Esco Cares for the Environment. One in every four of Esco's employees is involved in R&D and a number of them evaluate new components and/or designs to produce energy efficient equipment. Being GREEN is more than just modifying parts used to produce a new energy efficient technology, it is also embodied in the every aspect of the company.

Customer Service and Support. Our service does not stop once purchase has been done. Esco gives on-time customer service and offers end-user seminars, service training, preventive maintenance, and provides educational materials and informative videos.

As Esco takes the opportunity to respond to the world's needs, we aim not only to contribute in the advancement of scientific discoveries but also in making the world a safer, healthier, and better place to live in.

OVERVIEW

For Research Laboratories

Laminar Flow Cabinets are the premium selection for discerning researchers, offering a combination of value, high quality construction, low operating noise levels, and a wide product range to suit all budgets from the industry leader. Laminar flow cabinets are used in applications where there is no generation of biohazardous materials. They are designed to provide sterile working environment for products and processes.

Airstream® Gen 3 Laminar Flow Cabinets

Airstream® Laminar Flow Cabinets are designed to provide superior product protection for your samples in research laboratories by preventing the entry of room and airborne contaminants. They are built with the latest laminar flow technology and innovation, and offers a wide range of options for user preferences.

- Horizontal Laminar Flow Cabinet
- Vertical Laminar Flow Cabinet

OptiMair™ Vertical Laminar Flow Cabinets

OptiMair™ Vertical Laminar Flow Cabinets provide an ISO Class 3 air cleanliness within the work zone per ISO 14644.1, which is significantly cleaner than the usual Class 5 classification. Like all Esco products, OptiMair™ laminar flow cabinets are manufactured for the most demanding laboratory applications and designed for maximum chemical resistance and enhanced durability for a long service life.

For Industrial Process Protection

Enterprise® Laminar Flow Straddle Units

Enterprise® Laminar Flow Straddle Units are designed for larger-scale process protection in industrial applications typically requiring multiple units connected in an assembly line configuration. Esco straddle units provide ISO Class 4 air cleanliness within the work zone as per ISO 14644.1.

Airstream® Gen 3 Horizontal Laminar Flow Cabinet (Tempered Glass and Stainless Steel Side Walls)

Esco Airstream® Horizontal Laminar Flow Cabinet is built with the latest laminar flow technology and innovation to provide superior product protection for your samples and processes. It is powered by the latest generation DC ECM blower that saves up to 70% of energy compared to AC motor and offers stable airflow despite voltage fluctuation. Other key features include ULPA filtration system that creates ISO Class 3 work zone, Isocide™ antimicrobial coating that inhibits bacterial growth within 24 hours of exposure, Sentinel™ Gold microprocessor controller, and many more.

Enjoy the benefits of product protection with more product variants and sizes to suit more applications and user preferences.

Key features:

- Energy-efficient DC ECM blower
- ULPA filter (ISO Class 3 work-zone)
- Sentinel™ Gold microprocessor control system
- Isocide™ antimicrobial powder coating
- Standby mode for more energy savings
- Stable and self-compensating airflow
- Real-time airflow monitoring
- With fixed sash and sliding sash option

Airflow Sensor

- *Real-time airflow monitoring system*
- *Alerts the user if the airflow is insufficient*

Energy-efficient DC ECM Blower

- *Powered by latest generation DC ECM that is more efficient than legacy ECM and VFD motors*
- *70% energy savings compared to AC motor*
- *Stable airflow despite building voltage fluctuations & filter loading*
- *Standby mode that provides ISO Class 5 work-zone*

Airstream® Horizontal Laminar Flow Stainless Steel Side Wall Version

- Room air is drawn in from the top of the cabinet through a disposable pre -filter with 85% arrestance, trapping larger particles and prolonging the life of the main filter.
- Air is forced evenly across the ULPA/H14 filter. The result is a stream of clean laminar air within the work-zone, diluting and flushing contaminants present in the interior. The purified air travels in a horizontal, unidirectional stream towards the open front of the cabinet.
- A nominal filter face velocity of 0.45 m/s or 90 fpm ensures that there is a sufficient number of air changes within the enclosed area of the cabinet to maintain the cleanliness.

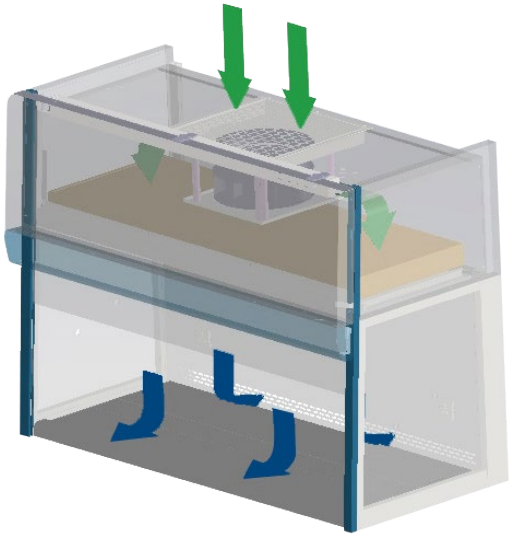
OptiMair™ Airflow Diagram



- During operation, room air is drawn in from the top of the cabinet through a washable pre-filter with 20% arrestance, trapping larger particles and prolonging the life of the main filter.
- The air is then forced evenly through the ULPA filter resulting in a unidirectional stream of clean air projected vertically over the internal work zone. All airborne contaminants are flushed and diluted, resulting in a particulate free work environment.
- The purified air then leaves the main work chamber across the entire open front of the cabinet and through Auto-Purge™ slots at the back wall of the work zone to eliminate air turbulence and the possibility of dead-air corners in the work zone.
- A nominal filter face velocity of 0.30 m/s (60 fpm) ensures that there is sufficient number of air changes within the enclosed area of the clean bench in order to maintain cleanliness.

- During operation, room air is drawn through the top of the straddle unit via a washable polyurethane pre-filter with 20% arrestance, trapping larger particles and increasing the life of the main filter.
- The air is then forced evenly through the ULPA filter with >99.999% efficiency, resulting in a unidirectional stream of clean air projected vertically over the internal work zone. All airborne contaminants are flushed and diluted, resulting in a particulate-free work environment.
- The purified air then leaves the storage area across the entire open front of the straddle unit.
- A nominal filter face velocity of 0.45 m/s (90 fpm) ensures that there is a sufficient number of air changes within the enclosed area of the straddle unit in order to maintain cleanliness.

Esco Centrifugal Fan with External Rotor Motor vs. Conventional Fan with Standard Motor

- Esco cabinets use German made ebm-papst® permanently lubricated, centrifugal motor/blowers with external rotor designs.
- Integrated blades narrow the profile and eliminate need for a motor shaft.
- Motors are selected for energy efficiency, compact design, and flat profile. The completely integrated assembly optimizes motor cooling.
- All rotating parts are unitized and balanced for smooth, quiet, vibration-free operation.

Applications
Cleanrooms, Electronics Assembly, Semiconductors, Aerospace, Pharmaceutical, Medical Devices Industries
Mycology and Food Microbiology
Plant and Mammalian Cell Culture
Clinical Pharmacy and Hospital Use
Applications benefiting from the isolated work surface frame design which virtually eliminates vibration

providing reliable product protection and energy-efficient technology
